

## David Smith Doorsets Specified for Council's New Operations Centre

Leading manufacturers of high performance door and doorsets David Smith St Ives Limited were delighted to work in partnership with M & S Contractors (E.A.) Limited of Ipswich, who were sub-contracted by the main developer Alfred McAlpine, to provide doorsets for a new operations centre on behalf of Huntingdonshire District Council.

The £4.6 million operations centre, known as Eastfield House, at Latham Road, Huntingdon, is the base from which the council run its refuse and recycling operations serving 65,000 homes in the district. The building also houses a new CCTV control room centre from which the network of more than 100 cameras that help to reduce crime in the district's town centres, will be monitored around the clock.

Working in conjunction with the project architects, Messrs Corstophine & Wright, David Smith Doors developed the exacting door specification, resulting in the manufacture of 50 wood grain laminate faced doorsets that offer premium levels of acoustic insulation, fire resistance, durability and aesthetic appeal.

"As we approach the 45 year milestone of David Smith St Ives Limited, it's nice to be able to celebrate it with this superb contract so near to our headquarters. Huntingdonshire District Councils new operations centre is a superb example of modern design and we were thrilled to supply our high performance doorsets", said Paul Davey, Business Development Manager – Doorsets Division, David Smith St Ives Limited.
